## 24/5 MORNING: Historical Centre (10.00 am – 2.00 pm)

The historical center of Naples is divided into three large streets (decumani) and small streets that intersect (cardini). The most famous decumano is known as Spaccanapoli, a road that, seen from above, literally divides the ancient center between the north and the South. Adapted over the centuries, it starts from Piazza del Gesù to arrive in the final stretch in Forcella.

This road has become important due to the large number of convents and the homes of powerful men who lived there.

Our tour starts from the hotel where the guests will meet the guide and will take a private bus to the beginning of the tour.

The tour itself will start Piazza Monteoliveto to go towards the ancient center; first stop is piazza del Gesù Nuovo with the visit inside the baroque church of Gesù Nuovo, completed in the eighteenth century, as well as for the imposing Renaissance facade and the remarkable baroque interior, today it is also known because it houses the body of Giuseppe Moscati, became a saint in 1987.

Guided tour of the Cloister of Santa Chiara.

The tour continues towards Spaccanapoli with stops in Piazza San Domenico, one of the oldest, largest and most historic squares in the city, up to Piazzetta Nilo and largo Corpo di Napoli, where you can admire the statue of the God Nile; Church of Sant'Angelo a Nilo where there is the funeral monument of Rinaldo Brancaccio by Donatello and Michelozzo.

During the tour of the historical centre, the visit to the Sansevero Chapel cannot be missed.

The Sansevero Chapel is one of the most impressive monuments that the human mind has ever conceived. A noble mausoleum, a temple of initiation, which admirably reflects the multi-faceted personality of its ingenious architect, Raimondo di Sangro, seventh Prince of Sansevero.

The Veiled Christ is one of the most famous sculptures in the world and it's situated in this amazing chapel.

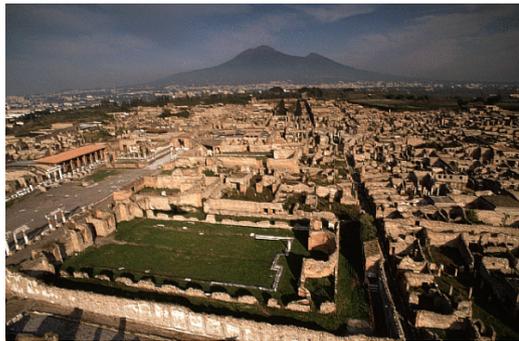

Veiled Christ is a carved marble sculpture by the Neapolitan artist Giuseppe Sanmartino completed in 1753. The sculpture is formed from a single block of white marble. It represents with greatest realism, Our Lord Jesus Christ in death, covered by a transparent shroud carved from the same block of stone as the statue.

Prince of Sansevero commissioned also some of the finest artists of his day to create sculptures of exceptional importance, among which the series of ten Virtues which are situated all around the chapel.

The tour then ends with on the exclusive terrace in Piazza San Domenico of Palazzo Petrucci a Michelin restaurant which has kept this wonderful place in the historical center. In this restaurant the participants will taste the very popular Neapolitan pizza and some very special appetizer and sweets.

## **24/5: POMPEI EXCURSION (departure from hotel 3.30 pm)**

Pompeii, a pearl of the Unesco heritage, can be visited in a two-hour journey that will lead to discover the ruins of a great civilization of the past .

Villas, temples, public buildings and private homes are just some of the testimonies that we can see and “touch” with hand. An important legacy, such as the plaster casts of the ancient Pompeians perished during the eruption , an exciting last farewell, a monument to transience and eternity merged together in the millenary lava.

The disappearance of this city is due to the volcanic eruption of Vesuvius, which occurred in 79 AD, which with its blanket of ash and lapilli completely buried the city. During this eruption other ancient cities located near Pompeii were destroyed, such as Herculaneum, Stabia and Oplonti.

This catastrophic event has made it possible to return to the present day one of the best testimonies of Roman life, as well as the best preserved city of the time. Most of the finds recovered are kept at the National Archaeological Museum of Naples. Thanks to the considerable amount of artifacts recovered during the excavations, it was possible to understand the uses, customs, eating habits and the art of life of over two millennia ago. Although excavation work began in 1748, only 49 of the 66 hectares on which the site extends have been excavated. So there is still a lot to discover!

### **DINNER IN THE CANTEEN**

On the way back to Naples the group will stop in a Vineyard situated at the bottom of the Vesuvius.

After the visit of the Vineyard and an explanation of the different phases of production, the guests will have a very traditional dinner inside the Vineyard (in case of bad weather we will use the inside places of the canteen).

This is a very special and personalized experience

## **25/5 MORNING (10.00 am – 2.00 pm)**

### **CAPODIMONTE ROYAL PALACE**

The Bourbon Palace of Capodimonte, an extravagant royal palace that occupies the entire Capodimonte hill in the outskirts of Naples, initially conceived as a place to house the Farnese collection. It was the historic residence of the Bourbons of Naples, and later of the Bonaparte, Murat and Savoy families.
